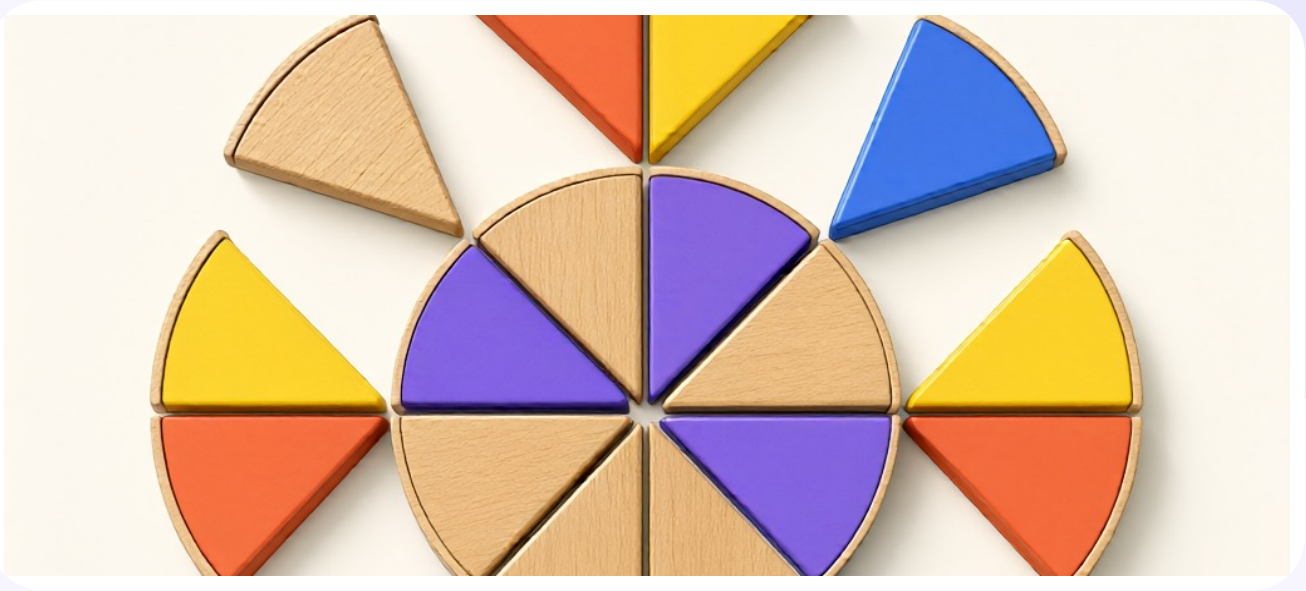
800 PROBLEMS · TIMED DRILLS

Multiplication & Division Mastery

800 practice questions from times tables to two-digit multiplication.



- 40 practice sets (20 questions each)
- Times tables 2–12
- Mixed multiplication and division

About this resource

Times-table drills, mixed multiplication and division, and two-digit challenge sets with full answer keys. This pack takes multiplication from first recall to confident two-digit work. The first sets isolate each times table; later sets mix tables, introduce division facts, and finish with two-digit multiplication and long division. Forty practice sets of twenty questions are included, each with an answer key. A one-page record sheet lets children track their best time and accuracy, which turns routine practice into a visible win.

How to use this book

Practise one set every other day. Record time and score, then review every mistake before moving on.

Every puzzle and exercise in this book was generated and checked by our content engine.

What's inside

- How to use these worksheets — A six-week fluency routine
- 40 practice sets — 20 questions per set
- Answer keys — Every question answered

How to use these worksheets

Fluency grows from short, regular practice. Each set should take five to eight minutes. If a set takes much longer, drop back to an earlier set rather than pushing through.

Mark the work with the child present. The useful moment is not the score — it is the explanation of a corrected answer. Ask: how did you work that out, and what would you do differently next time?

- One set a day, four or five days a week.
- Always mark together on the same day.
- Repeat any set with more than three mistakes after a week.
- Record the date and score on the progress page.

> GOOD TO KNOW
>
> Do not use these sheets as timed tests until accuracy is consistently above 90%. Speed follows accuracy, not the other way round.

DAILY PRACTICE ROUTINE & COMMITMENT

- [ ] Set a dedicated 15-minute daily focus window without phone or notifications.
- [ ] Work through each exercise completely before checking answers in the back.
- [ ] Review missed questions to understand the underlying rule or method.
- [ ] Celebrate consistency: completing one unit daily beats rushing an entire pack.
